📄 PROFILE

Software Developer with 4+ years of hands on experience building responsive and scalable web applications using modern JavaScript technologies. I've developed and deployed multiple client facing platforms, focusing on performance, usability, and clean architecture.

I specialize in React and Node.js ecosystems and have experience delivering projects from idea to deployment. I'm comfortable working remotely with designers and stakeholders. Currently seeking remote or international opportunities where I can contribute to product-focused teams and continue growing technically.

📁 PROFESSIONAL EXPERIENCE

Freelance Software Developer

2022 – Present

- Developed and deployed 8+ responsive web applications across different industries.
 - Improved website load speed by up to 30% through optimization and efficient asset handling.
 - Integrated third party APIs including payment systems and authentication services.
 - Converted UI/UX designs into fully functional web interfaces with mobile responsiveness.
 - Maintained 100% on time project delivery across completed contracts.

🧠 SKILLS

Languages:

JavaScript (ES6+), HTML5, CSS3, Photon

Frontend:

React.js, Next.js, Tailwind CSS

Backend:

Node.js, Express.js

Databases:

MongoDB, Firebase

MongoDB, Firebase

Git, GitHub, Vercel, Netlify

Other:

API Integration, Authentication, Responsive Design, Performance Optimization

🎓 EDUCATION

Computer Science

Federal University of Agriculture Abeokuta 🌐

09/2022 – Present | Abeokuta Nigeria

🏆 AWARDS

Hackathon Participation Certificate

DevHunt

2025

Top Performing Project Submission

University Tech Program

2024

Outstanding Contribution in Web Development Project

Academic Group Project

2024

Client Excellence Recognition

– Freelance Engagement (for timely delivery and performance optimization)

2022

📁 PROJECTS

UniGig 🌐

Student Opportunity & Gig Platform
Product Development Project

Founder & Technical Lead – Digimide

2024 – Present

- Built and launched an e-commerce platform serving curated gift packages.
- Designed landing pages that increased conversion rate by approximately 20% through layout optimization and simplified checkout flow.
- Managed hosting, deployment, and system maintenance independently.
- Handled technical infrastructure while coordinating branding and marketing efforts.

Software Developer

Klassen

02/2024 – 09/2024

Contract Role

- Integrated new automotive product data into the existing web platform.
- Optimized product upload process, reducing manual input time.
- Ensured responsive design consistency across product pages.
- Identified and resolved minor frontend bugs affecting user interaction.

CERTIFICATES

- JavaScript Algorithms and Data Structures Certification – freeCodeCamp
- Frontend Development with React – Coursera
- Node.js, Express & MongoDB Bootcamp – Udemy
- Full-Stack Web Development Certification – Meta (via Coursera)

A web platform designed to connect students with small gigs, internships, and campus opportunities.

- Built authentication system for user registration and role based access.
- Designed dashboard for students to browse and apply for opportunities.
- Implemented backend logic for listing management and user submissions.
- Structured database schema for scalable data handling.

Care Compass

Health Awareness Platform

A health information platform built to share verified awareness content and resources.

- Developed responsive content management interface.
- Structured categorized health articles for easy navigation.
- Implemented search functionality for faster access to information.
- Optimized page speed for mobile users.
- Designed with accessibility and readability in mind.

Tech Stack: Next.js, Node.js, MongoDB, Ai Integrations

Admin Analytics Dashboard

Personal Development Project

- Built data visualization interface for monitoring user metrics.
- Implemented role-based authentication.
- Created modular backend routes for structured API handling.

E-Commerce Product Platform

Freelance Project

- Developed product listing and checkout system.
- Integrated payment gateway APIs.
- Improved checkout flow efficiency by simplifying user steps.
